In Old Mexico.

John Brokmeyer departed for Sedalia last Friday and from there went to St. Louis to join a large excursion party who will make a tour of the south. The excursion first goes to Texas and thence to Old Mexico, visiting all prominent southern points enroute. They will be gone about two weeks, and will enjoy the best of everything during the tour.

Since the above was in type the following letter dated Dallas, Texas, May 15th, has been received and explains itself:

ON TRAIN AT DALLAS. EDS. DEMOCRAT, Versailles.

DEAR FRIENDS: - We are today feeling our way through the high waters in Texas. Our train is composed of passenger, industrial and immigration agents of the Missouri Pacific, Iron Mountain and Texas Pacific railroads. The train has five Pullman sleepers and two dining cars with all good things to eat. We have on the train 142 people and will land in Old Mexico on the 19th of this month. All trains are from four to five hours late on account of the high waters.

I have charge of car No. 4 and we certainly have good things thereon. Give all the boys my regards.

Very truly, JOHN BROKMEYER.

Motor Rallway Trains.

The Chicago & Alton railroad is making arrangements to put gasoline electric motor cars on their branch from Mexico to Fulton, the cars are already ordered and the system will be installed about the first of July. These cars will be run at the rate of a little over thirty miles an hour. The run between Fulton and Mexico will be made in an hour or less. The motive power of these cars will be gasoline. They will beable to make 70 miles an hour if necessary. These cars will carry 85 passengers exclusive of "smoker" It is estimated that these cars can be operated at 18 per cent of cost of steam. The Alton is taking the initial step in this direction,-Malta Bend Oni Vive.

The above is only another note of the fact that the motor is becoming more and more a transportation agent, and one that is cheap, convenient, clean and fast.

The railroads in the south are adopting them on many of their branch lines. The Mo. Pac, is putting them in operation between Butler, Mo., and Topeka, Kans, and have ordered fifty more for use on their western lines.

Why cannot we employ the conveniences of such a service? A motor car service on this line, between Boonville and Versailles, would give a nice service to a territory which needs it. Such a suggestates and suggestates and suggest to a territory which needs it. thing has been discussed before and we trust that the Boonville and Versailles branch of this road will not be forgotten by the Mo. Pac., in its distribution of motor cars .- Bunceton Tribune.

The Missouri Pacific will take you to St. Louis before five P. M.
